

# 9th Workshop on RFID Security

<http://rfidsec2013.iaik.tugraz.at>, July 9-11, 2013, Graz, Austria

RFIDsec is the premier workshop devoted to security and privacy in Radio Frequency Identification (RFID) with participants throughout the world. RFIDsec brings together researchers from academia and industry for topics of importance to improving the security and privacy of RFID, NFC, contactless technologies, and the Internet of Things. RFIDsec bridges the gap between cryptographic researchers and RFID developers through invited talks and contributed presentations.

The Workshop on RFID Security 2013 is the ninth edition of a series of workshops. This year's edition will be organized by the Institute for Applied Information Processing and Communications (IAIK), Graz University of Technology and takes place in Graz, Austria.

Topics of the workshop include but are not limited to:

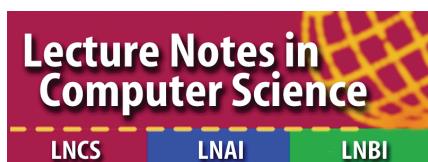

- New applications for secure RFID, NFC and other constrained systems
- Resource-efficient implementations of cryptography
- Attacks on RFID systems, e.g., side-channel attacks, fault attacks, hardware tampering
- Data protection and privacy-enhancing techniques
- Cryptographic protocols, e.g., authentication, key distribution, scalability issues
- Integration of secure RFID systems, e.g., infrastructures, middleware and security
- Data mining and other systemic approaches to RFID security
- RFID hardware security, e.g. Physical Unclonable Functions (PUFs), RFID Trojans
- Case studies

## Important Dates:

April 2, 2013	Submission Deadline
May 28, 2013	Notification
June 20, 2013	Pre-Proceeding Version
July 09-11, 2013	Workshop
July 25, 2013	Final Version

Authors are invited to submit papers (PDF or PS format) with novel contributions. Submitted papers must be original, unpublished, anonymous and not submitted other conferences/workshops that have proceedings or journals. Submissions must be written in English and should be at most 15 pages in total. Papers not meeting these guidelines risk rejection without consideration. All submissions will be blind-refereed.

Submission implies willingness of at least one of the authors to register and present the paper. The proceedings will be published in the Springer Lecture Notes in Computer Science (LNCS) series. Accepted papers should follow the instructions at <http://www.springer.de/comp/lncs/authors.html>.

# Workshop on RFID Security

## Program Committee

Jörn-Marc Schmidt	TU Graz (Austria), General & PC Co-Chair
Michael Hutter	TU Graz (Austria), PC Co-Chair
Gildas Avoine	Université Catholique de Louvain (Belgium)
Lejla Batina	Radboud University Nijmegen (The Netherlands)
Mike Burmester	Florida State University (USA)
Srdjan Capkun	ETH Zurich (Switzerland)
Paolo D'Arco	University of Salerno (Italy)
Thomas Eisenbarth	Worcester Polytechnic Institute (USA)
Martin Feldhofer	NXP Semiconductors (Austria)
Julio Hernandez-Castro	University of Portsmouth (UK)
Jaap-Henk Hoepman	Radboud University Nijmegen (NL)
Timo Kasper	Ruhr-University Bochum (Germany)
Kerstin Lemke-Rust	Hochschule Bonn-Rhein-Sieg (Germany)
Yingjiu Li	Singapore Management University (Singapore)
Nei-Wei Lo	National Taiwan U. of Science and Technology (Taiwan)
Konstantinos Markantonakis	Royal Holloway University (UK)
Aikaterini Mitrokotsa	École Polytechnique Fédérale de Lausanne (Switzerland)
Karsten Nohl	Security Research Labs (Germany)
Berna Ors	Istanbul Technical University (Turkey)
Pedro Peris-Lopez	Carlos III University of Madrid (Spain)
Axel Poschmann	Nanyang Technological University (Singapore)
Pankaj Rohatgi	Cryptography Research Inc. (USA)
Kazuo Sakiyama	University of Electro Communications (Japan)
Nitesh Saxena	University of Alabama at Birmingham (USA)
Marc Wittenman	Riscure (The Netherlands)
Avishai Wool	Tel Aviv University (Israel)

---
